TUCHEL
MASCHINENBAU GmbH

Dear customer!

When you are satisfied with our products, when our machines facilitate your daily work, when we have entirely realized your requirements, then we've done a good job!

For the development of our products we focus on the input from our customers, pick up thoughts and ideas and orientate ourselves on what practitioners suggest. Thus, we manufacture innovative machinery that doesn't only look brilliant, but which is of real benefit for the user, too.

Innovative power combined with high quality and a clear price-performance policy ensures product acceptance. Based on this main idea we've defined three cornerstones for our company's success:

Innovative solutions – In collaboration with our customers we develop solutions for everyday problems. Our engineers do also work outdoor, at the front line, not only on the computer!

Durable products – They form the measurable basis for customer satisfaction and give long-term confidence in the brand Tichel. We find that in the end sophisticated products are the best publicity!

All-round service – For us that's giving detailed technical advice to the customers before selling a product, briefing and training and a well-organized spare parts service, even many years after purchase and sale.

Be inspired by our products! Benefit from the wide range of attachments and enlarge your equipment pool!

Challenge us!

Yours sincerely

Dieter Beckmann and Dennis Schürmann

Cleanness is quite Simplex!

TUCHEL-SWEEP SIMPLEX

For
small tractors,
yard loaders,
small wheel loaders,
front mowers

TUCHEL
MASCHINENBAU GmbH

Low weight – high performance!

The sweeper **SIMPLEX** has been designed for small municipal tractors, Front-mowers, yard loaders and small wheel loaders. In particular. The basic configuration of this sweeper includes optionally PTO-drive via PTO-shaft or hydraulic drive. The gearbox of the PTO-drive is adjustable, The PTO-shaft is included. The low weight of the **SIMPLEX** makes it the appropriate machine for front lifting-systems with a low lifting-capacity. The 100% PP full bristle brush (Ø 400 mm) guarantees high durability. You can use the **SIMPLEX** for summer and winter service. Broom adjustment is done via spindle. The brand-named support-wheels are 180 x 50 mm, incl. parking stands. Whether simple sweeping or sweeping with hopper does not have to be dismantled.

Options

- Dirt collector, hydraulic tip, incl. PU-lip and 3rd support wheel
- Water-spray system with 12 V intermitting pump, switch board, 100 l water tank and rear 3-point linkage (Cat I/II) for the tank (H2O only for rear mounting.)
- Hydraulic angling (1 additional double-acting hydraulic drive circuit required)
- Hydraulic side brush, fully adjustable, for corner sweeping
- Splash guard for model without hopper, extra long, incl. protection flap
- Snow brush
- Extra colour shade

Simple sweeping

Cleanly „tucheled“!

TUCHEL-SWEEP **KOMPAKT**

For small
tractors, communal
vehicles & small
loaders!

TUCHEL
MASCHINENBAU GmbH

Clean sidewalks, squares and roads quite simply!

The basic configuration of this sweeper includes optionally PTO-drive via PTO-shaft or hydraulic drive. The sweeper has been developed in particular for your compact tractor or communal vehicle. 100% PP brush discs in honey-comb shape (ø 520 mm) stand for high durability! The **KOMPAKT** can be used for summer and winter services. The user-friendly adjusting-lever allows a smooth adjustment of the brush. Another item of basic equipment is the mechanical angling. Whether simple sweeping or sweeping with hopper, the hopper does not have to be dismantled.

Technical data	135	150	175	200

Options

- Large hopper incl. hydraulic tip, 3rd wheel and PU-lip (to avoid side-slip of stonelets)
- High-fill flap to increase fill-capacity of hopper (+ 30% approx.)
- Mixed brush (50% wire / 50% PP) or snow brush
- Water-spray system, incl. water-pump and 100 l tank (for rear-mounting via three-point linkage) or directly on the machine
- Hydraulic angling (1 additional double-acting hydraulic drive circuit required)
- Hydraulic side brush, adjustable (for corner sweeping)
- 3rd support-wheel incl. height adjustment, for simple sweeping
- Splash guard for winter service
- Reinforced wheels ø 200 x 50 mm for hard work
- Road traffic equipment (prescribed to drive on public roads)
- Extra colour shade

Hitch systems

- A-frame
- Three-point linkage
- Front mower hitch (direct mounting)
- Quick hitch for Tüchel-Trac TRIO
- Quick hitch for yard loaders, small wheel loaders or municipal vehicles incl. 3D floating systems.

Side brush incl. speed adjustment

Yard loader / Front loader attachment with parallelogram

Adjusting-lever and parking stand

Simple sweeping mode (standard)

This road sweeper courts you!

TUCHEL-SWEEP
ECO Pro

For tractors,
yard loaders
& fork-lifts!

TUCHEL
MASCHINENBAU GmbH

Quality for cost-conscious people!

The **ECO Pro** has primarily been made for cost-conscious farmers who want a first-quality road sweeper. Thanks to multiple working widths this road sweeper cannot only be attached to tractors, but also to yard loaders and small forklifts. A variety of hitch systems guarantees an optimum fitment to your carrier-vehicle. Basic equipment incl. brand-named wheels with height adjustment, mechanical angling incl. shear-off bolts and a resistant PP-brush. The basic machine has a brush diameter of 520mm. The adjustment of the brush is done by an easy locking lever. The machine includes a sophisticated broom positioning that assures an even distance. On demand, the **ECO Pro** can be equipped with a dirt collector incl. hydraulic emptying and free sweep system (standard). So you are able to work with the dirt collector or to use the **ECO Pro** for simple-sweeping without having to dismount the hopper.

Options

- Hopper with PU-lip, hydraulic emptying
- Levelling for a regular bottom guidance
- Water-spray system to reduce dust, incl. 100 / 200 l tank and intermitting water-pump
- 3rd support wheel for a regular bottom guidance
- Hydraulic angling (1 additional double-acting hydraulic drive circuit required)
- Reinforced wheels ø 200 x 50 mm for hard work
- Hydraulic side brush, adjustable (for corner sweeping)
- Extra colour shade

Technical data		135	150	180	230
Working width (straight/angled)	cm	135 / 127	150 / 141	180 / 169	230 / 211

Hitch systems

- Three-point linkage incl. parking stand
- A-frame, height adjustable incl. pendulum adapter and with quick-locking system
- Yard loader / Front loader hitch with parallelogram and pendulum compensation incl. height indicator
- Fork-tines attachment incl. parallelogram and height indicator

Levelling for a regular bottom-guidance

hydraulic emptying

Parallelogram incl. height indicator

Adjusting-lever system with optimized sweeping-angle

A clear plus factor!

TUCHEL-SWEEP PLUS

For tractors,
yard loaders,
communal vehicles
& fork-lifts

TUCHEL
MASCHINENBAU GmbH

...meeting any requirements.

This popular all-rounder really meets any requirements. Thanks to its variety of attachment systems and working widths the multi-purpose **PLUS 590** will be almost appropriate for all types of carrier-vehicles. The broom of the **PLUS 590** has been enlarged to 590 mm and is equipped with the unique 100% PP WaveLine mixture with CrownLock system, standing for high longevity and excellent sweeping results. The comfortable and easy approved broom adjusting-lever system guarantees optimal bottom guidance and the brand-new overrun control of the broom serves as a protection for the high-quality hydraulic components. Moreover, the entire series come with brand-named wheels $\varnothing 250 \times 50$ mm and parking stands. On demand, the **PLUS 590** can be equipped with a dirt collector incl. hydraulic emptying (standard). Standard equipment likewise includes a sophisticated broom positioning that assures an even distance between broom and dirt collector in order to always achieve the best possible sweeping-angle. The "simple sweeping" function has been entirely re-engineered, so as to enable the user to either work with the dirt collector or to use the **PLUS 590** for simple-sweeping without having to dismount the hopper.

Options

- Large hopper incl. PU-lip
- High-fill flap to increase fill capacity of hopper (+ 30% approx.)
- 3rd support-wheel for a regular bottom guidance
- Joint bearing (for three-point linkage / load relieving of 3rd wheel)
- Water-spray system to reduce dust, incl. 100 / 200 l tank and intermitting water-pump
- Levelling for a regular bottom guidance
- Hydraulic and adjustable side brush for corner sweeping (water-spray system on option)
- Internal hydraulic motor (protected against damage)
- Oil flow controller > 90 litres
- Hydraulic angling (1 additional double-acting hydraulic drive circuit required)
- Reinforced wheels $\varnothing 250 \times 80$ mm for hard work
- Road traffic equipment (prescribed to drive on public roads)

Hitch systems

- Three-point linkage for tractors
- A-frame, height adjustable incl. pendulum adapter
- Yard loader / Front loader hitch with parallelogram and pendulum compensation incl. height indicator
- Fork-tines attachment incl. parallelogram and height indicator
- Attachment system for communal vehicles incl. pendulum adapter
- Quick-hitch system for wheel loaders, incl. 3-D levelling and height indicator (up to 0,5m³ bucket capacity)
- Attachment plate for Unimog DIN 76060, size 3 and 5, incl. lifting cylinder, levelling and pendulum compensation

Side brush $\varnothing 600$ mm

Yard loader / Front loader attachment with parallelogram and pendulum compensation incl. height indicator

New levelling

The pro for „neat work“!

TUCHEL-SWEEP PROFI 660

For
wheel loaders,
fork-lifts,
tractors &
Unimogs

Your specialist for all applications!

The **PROFI 660** is the new generation of the well-known Tüchel sweeper machine series PROFIL. Its brush diameter is of 660 mm and the standard brush is equipped with a 100% PP WaveLine mixture in honey comb shape with CrownLock system as well as with a parking stand to protect the bristles. Additionally, an internal motor is part of the standard equipment. As an option, you can equip this sweeper with an enlarged dirt collector and choose between sweeping with hopper or simple sweeping (without dismounting the hopper). The **PROFI 660** is also equipped with the special Tüchel adjusting-lever system incl. an optimized sweeping-angle, which guarantee that the brush rings keep an uniform distance to the dirt collector in the event of wear and tear. In addition, the built-in after-running controller for the main brush protects the high-quality hydraulic components. The 3D levelling, being particularly developed for the **PROFI 660**, includes now a larger pendulum adapter, in order to balance floor unevenness in an optimal way.

Options

- Large hopper incl. PU-lip, high-fill flap (+ 30 % fill capacity), hydraulic tip and 3rd support-wheel for an equal bottom guidance
- Oil flow controller (> 90 litres / > 130 litres)
- Hydraulic angling (1 additional double-acting hydraulic drive circuit required)
- Splash guard for model without hopper, extra long, incl. protection flap
- Water-spray system against dispersion of dust, incl. 200 l water tank and dry running protective pump
- Hydraulic and adjustable side brush for corner sweeping (water-spray system on option)
- Leaves deflector
- Scraping device
- Reinforced wheels ø 250 x 80 mm or CSE tyres ø 306 x 116 mm, for hard work
- Road traffic equipment (prescribed to drive on public roads)
- Extra colour shade

Technical data		200	230	260	280

Side brush

The sweeping champion!

TUCHEL-SWEEP PROFI-CHAMP

For
big wheel
loaders, tractors
& Unimogs

TUCHEL
MASCHINENBAU GmbH

Sweeps sparkling clean!

The new **PROFI-CHAMP**, with its internal hydraulic motor and the 750 mm broom, is due to the robust frame, the top-quality hydraulic components and the extra big wheels, suitable for even extreme applications. The standard brush is equipped with a 100% PP WaveLine mixture in honey-comb shape with CrownLock system. The special Tuchel adjusting-lever system with an optimized sweeping-angle ensures equal bottom guidance. In order to protect the hydraulic-components all technical details have been reworked and an after-running controller for the main brush has been integrated. The 3D levelling, being particularly developed for the **PROFI-CHAMP**, includes now a larger pendulum adapter, in order to balance floor unevenness in an optimal way. The **PROFI-CHAMP** can also be used for simple sweeping, without dismounting the hopper.

Options

- Large hopper incl. PU-lip, high-fill flap (+ 30% fill capacity), hydraulic tip and 3rd support-wheel for an equal bottom guidance
- Oil flow controller (> 90 litres / > 130 litres)
- Hydraulic angling (1 additional double-acting hydraulic drive circuit required)
- Water-spray system incl. 200 / 400 litres tank and water pump with intermission function and protection against dry run
- Hydraulic and adjustable side brush for corner sweeping (water-spray system on option)
- Hydraulic lifting and lowering for side brush
- Leaves deflector
- Scraper
- Road traffic equipment (prescribed to drive on public roads)
- Extra colour shade

With scraper

Our heavy-weight champion!

TUCHEL-SWEEP PROFI-GIGANT

For big
wheel loaders &
tractors

TUCHEL
MASCHINENBAU GmbH

This pro is a gigantic cleaner!

The **PROFI-GIGANT** road sweeper has been designed for the cleaning of extra large surfaces, such as airports, harbours, recycling companies, building-sites and industrial surfaces. With its very massive design it doesn't shy away from anything.

The hitch-pendulum joint protects the **PROFI-GIGANT** against overcharge by heavy carrier-vehicles and ensures an optimum bottom guidance. With its various working widths from 260 cm up to 350 cm and a brush diameter of 800 mm it cleans everything! The brush is driven by two strong, internal motors incl. oil flow controller. In order to facilitate brush adjustment, the machine has a special adjusting-lever system, which is to ensure that the brush wears down regularly.

The **PROFI-GIGANT** can be used with a hydraulic collector or for simple sweeping, without dismounting the collector (hydraulic lifting, with shut-off cock).

Technical data	260	290	320	350
Working width (straight/angled) cm	260/ 236	290/ 263	320/ 290	350/ 317

Measurements and weights are approx. and non-binding.

* incl. quick hitch for wheel loaders

Options

- Large hopper incl. PU-lip, high-fill flap, hydraulic tip (via 2 cylinders, incl. shut-off cock for simple sweeping) and integrated 3rd and 4th support-wheel
- Hydraulic angling via 2 cylinders (1 additional double-acting hydraulic drive circuit required)
- Water-spray system incl. 2 x 200 l tanks and intermitting pump for dust suppression
- Fully adjustable hydraulic side brush for corner sweeping, incl. speed regulation and shut-off cock
- Road traffic equipment (prescribed to drive on public roads)
- Extra colour shade

Hitch systems

- Quick-hitch for wheel-/ telescopic loaders with 3D levelling and height indication
- Three-point linkage CAT I/II incl. 3D levelling and height indicator

Ideal for terrain with rail traffic

2 strong, internal motors for driving the main brush

3D levelling ensures excellent bottom guidance

Easy brush adjustment by adjusting-lever system

Our BIG will succeed!

TUCHEL-SWEEP BIG

For
skid steer
& wheel
loaders

TUCHEL
MASCHINENBAU GmbH

You're flooded with dirt? No problem for our BIG!

The **BIG** bucket sweeper has particularly been designed for your skid steer or wheel loader and is standard equipped with a quick-hitch system. The huge shovel allows you to pick up large amounts of sweepings.

This machine works totally different from ordinary road sweepers. The brush is mounted in front of the debris collector, which looks like a bucket. Advantage: the weight of the swept material comes close to the carrier-vehicle and ensures an excellent distribution of weight, which is very important, if you work with compact and skid steer loaders.

Since the mounting point has been kept low, a good visibility for the driver is guaranteed. The edge on the shovel allows you to push off solidified sweepings. The resistant brush (100% PP, in honey-comb shape, Ø 600 mm) is easy to adjust and to exchange.

The **BIG** is driven by a strong hydraulic motor, incl. overload protection that is placed inside the shaft. Thus, it's well protected against any damage. A reinforcement kit makes your **BIG** the perfect machine for preparing hard standing (for instance for asphalt milling).

Options

- Reinforcement kit for continuous operation: Anti-wear strip made from armour steel / screw-under knives in the bottom and on the side, double durability provided by simply turning the strip
- Mixed brush (50% PP / 50% wire)
- Fully adjustable hydraulic side brush (50% PP / 50% wire)
- Water-spray system with 100 / 200 l tank, incl. intermitting-pump and switch board for dust suppression
- Extra colour shade

Technical data		120	150	180	210

* incl. Quick-hitch Bobcat

Measurements and weights are approx. and non-binding.

Hitch systems

- Quick-hitch adapter for wheel loaders
- Adapter for skid steer loaders (different from Bobcat system)

BIG incl. quick-hitch adapter for wheel loaders (optional)

Reinforcement kit for continuous operation

Water kit 100 l / 200 l for dust suppression

Fully adjustable hydraulic side brush (50% PP / 50% wire)

Sweeping without dusting!

For
fork-lifts
& wheel
loaders

TUCHEL-SWEEP
IDEAL 650

TUCHEL
MASCHINENBAU GmbH

Cleanness made to ideal measure!

The **IDEAL** road sweeper is in particular determined for industry and construction. It finds application in open areas, car parks and on building sites. Due to its dust-proof enclosure the Ideal road sweeper is the perfect machine to clean your buildings. Its attachment system allows you to fit it easily to your fork-lift or wheel loader in no time at all. The very robust machine includes a debris collector with hydraulic tip and assures high durability.

The specific floating brush is the heart of the **IDEAL** sweeper. The special brush in V-shape sweeps both, sticky and fine dirt and thus ensures an excellent sweeping result. The internal hydraulic motor is protected against damage and three support-wheels are to follow the ground contours.

Options

- Water-spray system with 100 / 200 l tank and intermitting-pump for dust suppression
- Fully adjustable hydraulic side brush
- Heavy-duty wheels \varnothing 250 x 80 mm for hard work
- Oil flow controller (> 90 litres)
- Road traffic equipment (prescribed to drive on public roads)
- Separate hydraulic aggregate incl. oil tank
- Extra colour shade

Effective weed removal!

TUCHEL-SWEEP
WB 750

For
wheel loaders, tractors,
yard loaders,
fork-lifts, small com-
munal vehicles &
excavators up to 6 t

TUCHEL
MASCHINENBAU GmbH

Environmentally friendly and thoroughly!

The new hydraulically driven weed brush for wheel loaders, tractors, small communal vehicles and excavators allows you to remove any kind of weed, very easy and effortless, and free of chemicals.

The disc brush has a diameter of 750 mm and is equipped with flat wire bunches, so that even stubborn dirt is no longer an obstacle.

To ensure removal even in edge areas, the weed brush is equipped with a mechanical lateral displacement.

Through manually adjusting the tilt angle, you can achieve the highest possible scratch effect.

Part of the basic equipment is also an adjustable rubber protection cloth which prevents stones and debris flying around uncontrollably.

Technical data		
Disc brush \varnothing	mm	750
Brush type		Flat wire bunches
Direction of rotation		right / left
Motor		Danfoss OMS Hydr.-Motor
Required oil flow		20 l / min at 180 bar
Lateral displacement (not for excavators)		Mechanical by 450 mm
Rubber protection cloth		Included

Measurements and weights are approx. and non-binding.

Options

- Rope wire bunches, plastic covered, screwable
- Hydr. inclination adjustment of the brush (1 additional double-acting control circuit necessary)
- Hydr. lateral displacement by 450 mm (1 additional double-acting control circuit necessary)
- Guide wheel / support wheel \varnothing 200 x 50 mm (for < 0,4 m³ bucket capacity)
- Extra strong castor for guide wheel \varnothing 250 x 80 mm (for > 0,4 m³ bucket capacity)
- Throttle valve for speed regulation
- Electro-magnetic switching 12 V, for vehicles with only one double-acting hydraulic control circuit
- Electro-magnetic switching 12 V, for vehicles with two double-acting hydraulic control circuits
- Extra colour shade
- Hydro Drive for vehicles without sufficient oil capacity (oil tank with approx 55 liters volume)

Hitch systems

- Quick-hitch MS01 / MS03 for mini excavators with max. operating weight up to 6 t
- Three-point linkage CAT I / II
- A-frame CAT Communal / 0 / I
- Yard loader attachment system
- Wheel loader attachment system (up to 0,8 m³ bucket capacity)
- Attachment system for communal vehicles
- Attachment system for fork-lifts

Height adjustable support wheel

Plastic covered rope wire bunches

Telescopic, with hydr. inclination adjustment

Hydro Drive

Quickly free of snow...

For
small tractors,
yard loaders
& fork-lifts

TUCHEL-SNOW

L-SK

TUCHEL
MASCHINENBAU GmbH

... for little money.

Thanks to its various hitch-systems the **L-SK** snow blade can be easily attached to small tractors, yard loaders and fork-lifts and is even appropriate for the Tichel-Trac. Standard equipment includes spring flap segments, PU-lip (polyurethane), mechanical angling and height adjustable skids.

Technical data		125	155	185
Total width	cm	125	155	185
Clearing width (in straight / angled position)	cm	125/ 107	155/ 133	185/ 160
Weight*	kg	84	97	110
Height	cm	50		
Angling	degrees	up to 30		

* without hitch system

Measurements and weights are approx. and non-binding.

Options

- Hydraulic angling (1 double-acting hydraulic drive circuit required)
- Levelling
- Wheels (ø 150 x 50 mm)
- Road traffic equipment (warning flags & -holders, side-marker lamps LED)
- Extra colour shade

Hitch systems

- Three-point linkage
- A-frame
- Yard loader hitch incl. levelling and pendulum compensation system
- Fork-tines attachment

The main features at a glance:

- Interceptors on both sides included in standard equipment
- Spring flap segments (anti-icing)
- Optimum angle of inclination of the clearing lip, for perfect snow clearing
- Edge bending (side and top) ensures high stability of the snow blade
- Wheels instead of skids on option

Edge bending (side and top)

Spring flap segments (anti-icing)

Skids (wheels on option)

Hydraulic angling

The little snow master!

TUCHEL-SNOW

SK-K

For
small tractors,
yard loaders,
wheel loaders,
fork-lifts &
communal
vehicles

TUCHEL
MASCHINENBAU GmbH

Speedy snow clearing!

The stiff snow blade **SK-K** incl. PU-lip (polyurethane), or also available with steel lip, is appropriate in particular for clearing snow in the communal sector. The overrun protection makes the plough fold automatically, if it hits a barricade and thus protects it against any damage. Various working widths and hitch systems ensure an excellent adaptation to your carrier-vehicle. This makes the SK-K particularly suitable for clearing foot and cycle paths, narrow roads or small car parks. Infinitely height adjustable wheels are standard equipment and avoid scraping on road carpets.

Options

- Hydraulic angling (1 double-acting hydraulic drive circuit required; on demand incl. pressure limit valve)
- Extra strong, reinforced wheels (ø 200 x 50 mm) for hard work
- Road traffic equipment (warning flags & -holders, side-marker lamps LED)
- Extra colour shade

TUCHEL-SNOW

SK-F

For
small tractors,
yard loaders,
wheel loaders,
fork-lifts
& communal
vehicles

TUCHEL
MASCHINENBAU GmbH

Free of snow in a flash!

Standard equipment of the **SK-F** snow blade incl. anti-icing spring flap segments, PU-coated lip (polyurethane), mechanical angling and infinitely height adjustable wheels. On option, Tüchel offers a highly wear resistant communal- as well as a steel lip. The optimum angle of inclination ensures perfect and easy snow clearing. Edge bending (side and top) makes the **SK-F** even stronger and much more stable. Various width and hitch systems allow many application possibilities on small tractors as well as yard loaders, fork-lifts and small communal vehicles. Interceptors (right/left) protect the machine against damage.

Options

- Hydraulic angling (1 double-acting hydraulic drive circuit required; on demand incl. pressure limit valve)
- Extra strong, reinforced wheels (ø 200 x 50 mm) for hard work
- Road traffic equipment (warning flags & -holders, side-marker lamps LED)
- Extra colour shade

A winter fairy tale!

TUCHEL-SNOW L-SF

For
wheel- &
telescopic loaders, trac-
tors,
fork-lifts &
Unimogs

TUCHEL
MASCHINENBAU GmbH

Snow is marvellous...

...because the new **L-SF** helps you to clear snow from any surface effectively and easily. Standard equipment of the **L-SF** includes polyurethane coated spring segments. Moreover, Tüchel has optimised the angle of inclination to achieve a maximum possible quiet running of the snow blade. The anti-freezing spring segments allow a time-saving snow clearance, since there is no need of bothersome de-icing any longer. Reinforced protection caps on the right and left serve as a protection against shocks, to preserve the snow blade, if it encounters a badly visible obstacle under the snow cover. Basic equipment: mechanical angling towards the right and the left and very strong reinforced wheels avoid marks and scratches on the surfaces to be cleared.

Options

- Hydraulic angling (1 double-acting hydraulic drive circuit required); on demand incl. pressure limiting valve
- Levelling
- Extra strong wheels (250 x 80 mm) for hard work
- Plastic snow-guide cloth (for a good visibility for the driver)
- Road traffic equipment (flags,-holders, side-marker lights)
- Highly-resistant rubber lip w/corundum inlay for excellent sliding and long durability
- Extra colour shade

Technical data		200	225	250	275	300
Width (straight/angled)	cm	210/ 181	235/ 203	260/ 224	285/ 245	310/ 267
Clearing width (straight/angled)	cm	200/ 173	225/ 194	250/ 215	275/ 237	300/ 258

Height	cm	82	82	82	82	82
Angling	degrees	up to 30				

* without hitch system

Measurements and weights are approx. and non-binding.

Hitch systems

- Fully floating wheel-/ telescopic loader hitch incl. height indicators
- Three-point linkage (stiff attachment or fully floating incl. height indicators)
- A-frame (stiff attachment or fully floating incl. height indicators)
- Attachment plate for Unimog, size 3/5 incl. lifting-cylinder and levelling for an optimum guide down to the ground floor
- Fork-tines attachment

Height indicators

PU coated (standard) anti-icing spring flap segments

Parking stand

Infinitely height adjustable wheels

Various hitch systems available

The King of snow!

TUCHEL-SNOW

SF

For
wheel- /
telescopic loaders,
tractors, fork-lifts
& communal
vehicles

Gets a lot cleared away!

Standard equipment of the SF snow blade includes spring flap segments, which assure a quick clearing of snow. The integrated protection system prevents the snow blade, if it strikes a barrier under the snow cover. As requested, the SF can be equipped with a PU-lip (polyurethane), a highly resistant communal lip, which guarantees long durability and excellent sliding qualities, or with a steel lip. Height adjustment of the clearing lip is done by the wheels. Heavy-duty wheels, in order to avoid marks on road surfaces, are available on option.

Options

- Hydraulic angling
(1 double-acting hydraulic drive circuit required; on demand incl. pressure limit valve)
- Pressure retention valve
- Skids
- CSE-wheels (heavy-duty) \varnothing 306 x 116 mm
- Snow-guide cloth
(for a good visibility for the driver)
- Road traffic equipment
(warning flags & -holders, side-marker lamps LED)
- Extra colour shade

That runs like clockwork!

TUCHEL-SNOW VARIO

For
small tractors,
Unimogs
& fork-lifts

TUCHEL
MASCHINENBAU GmbH

With this you'll get everywhere!

The **VARIO** snow plow is the ideal machine for a flexible clearing of snow. Hydraulic angling, secured by nitrogen bubbles, allows to use the two-part snow plow in V-, Y- and straight position. The PU-coated (polyurethane) spring flap segments provide security and protect the machine against damage. Infinitely height adjustable wheels assure clearing without leaving any marks on road surfaces. Various hitch systems allow a perfect attachment onto your carrier-vehicle.

Options

- Electro-magnetic switch for carrier-vehicles with one double-acting hydraulic drive circuit, only
- Levelling
- Skids
- Extra strong wheels (200 x 80 mm, steel-welded - from 260 cm ø 306 x 116 mm)
- Perfect control; blades adjustment in straight position right / left, respectively from Y- to V-shape in one operation (only one double-acting hydraulic drive circuit required)
- Road traffic equipment (warning flags & -holders, side-marker lamps LED)
- Extra colour shade

Technical data	150	180	210	260	320	370

tractors

TUCHEL-SNOW
Salt spreader TS 120 / 200

TUCHEL
MASCHINENBAU GmbH

Winter maintenance made easy!

The two salt spreaders **TS 120** and **200** have reservoirs with a capacity of 120 or 200 litres and can be attached in a few simple steps. Driven by a strong geared motor, the spreader can dispense up to 6 m (depending on the material). The speed of the disperser can be adjusted comfortably and easily in the driver's cab.

The desired output quantity is additionally adjusted by means of a dosing slider electrically via the control unit. Clearly defined spreading tables provide the necessary information, to achieve a uniform spread pattern, according to the location and material.

The newly developed agitator inside the container prevents bridging. Moreover, all components in contact with salt are made of high quality V4A stainless steel (chromium-nickel steel with molybdenum additive), in order to protect the **TS 120/ 200** against corrosion.

Benefit from our all-round carefree package: sweeper or snow blade in combination with the new salt spreader **TS 120/200**. Everything from one source - from Tüchel, the manufacturer with many years of know-how in snow clearing!

Technical data		120	200
Filling capacity	l	120	200
Voltage	Volt	12	12
Width	cm	67	67
Height	cm	105	131
Weight*	kg	50	59

Disperser

The versatile all-rounder!

TUCHEL-TRAC[®]
TRIO

For
agriculture,
ground
maintenance,
horse farms...

TUCHEL
MASCHINENBAU GmbH

Excellent mobility on three wheels!

Are you looking for a powerful, manoeuvrable and professional working tool that is quickly ready for use?

It's versatility makes the **Tuchel-Trac TRIO** a reliable helper in order to minimize hard physical work in agriculture, parks and landscaping, local authorities or in the building-industry. The compact design allows an entire overview from the driver's seat and short-way tool changes.

The all-wheel drive, the rear-steering shaft and the hydraulic steering characterise our three-wheeler. You can put the **Tuchel-Trac TRIO** to excellent work in different terrain and very tight spaces. Two double-acting hydraulic drive circuits ensure a fast and efficient work performance. The control levers of the working hydraulics are located conveniently directly beside the adjustable seat. A completely swivelling plastic engine cover gives easy access to the components for maintenance and service. With the **Tuchel-Trac TRIO**, you own an easy-to-operate, powerful vehicle.

Options

- Lawn tyres
- Rear weights
- Tow bar
- Rollover bar
- All-weather roof
- Working lights
- Engine pre-heater

Technical data		2 cylinder
Engine	kW (HP)	10,3 (14) at 3200 rpm
Hydraulic power	l/min	25 at 3200 rpm
Tank capacity (hydraulics)	l	65

Measurements and weights are approx. and non-binding.

Equipment:

- Kubota diesel engine 14 HP (2 cylinder) or 20 HP (3 cylinder)
- All-wheel (hydraulic drive)
- Two driving speeds
- Hydraulic steering
- Two double-acting drive circuits, one pressureless return
- Quick-hitch system

TT-Trio with snow blade

Weed brush

Fits through most doorways

Economic working

Attachment tools - in the barn and stall.

TUCHEL-TRAC®
TRIO

Number 1 in the domain of cow comfort: Cleaning of high-bed and deep-bed cubicles / slatted floors, bedding of straw and lime - all in just one operation!

Your advantages for stable maintenance:

- No more hard manual labour
- Time savings by the use of bedding spreader, manure scraper and / or food turner
- Clean, healthy cows on bedded rubber mats/deep-cubicle stalls (fewer udder infections)
- Saving of bedding material by appropriate dosage (chopped straw, sawdust, ground straw, lime-straw mixture)
- Always clean slatted floors by use of the manure scraper (fewer claw diseases)
- Scraping on slatted floors and sweeping high-bed cubicle stalls in just one go
- Driving on slatted floors with low load rating
- Mixing the fodder and pushing it towards the trough improves fodder ingestion of the cows
- Always a clean feed table

Bedding tool „E“ incl. agitator (automatic fill)

- Basic container: 450 litres, optional container extensions +170 l / +375 l
- Slurry scraper: working width 1450 mm
- Side brush ø 750 or 850 mm, 100 % PP, hydraulic adjustment by hydr. cylinder incl. tilting-device
- Infinitely variable speed of the agitator and the conveyor belt

Bedding tool „F“ incl. worm conveyor (manual fill)

- Basic container: 160 litres
- Slurry scraper: working width 1450 mm
- Side brush ø 750 or 850 mm, 100 % PP, hydraulic adjustment by hydr. cylinder

Food turner

- Width 110 cm
- Pivot-mounted on both sides
- Cleaning lip behind the worm-type food turner

Manure scraper with double lip

- Width max. 130 cm, adjustable, height 35 cm
- On option: hydraulically adjustable side brush

Manure scraper

Optimal claw health by clean slatted floors

Cleaning slatted floors - high-bed and deep-bed cubicles - and bedding - all at once!

Bedding tool „E“ incl. parking stand

Attachments tools - around the farmyard.

TUCHEL-TRAC®

TRIO

The TUCHEL-TRAC TRIO simplifies your farm work:

Your advantages for farm maintenance & landscape conservation:

- Clean farm yards, parks, cemeteries, riding compounds, pavements...
- Easy cleaning of corners and hard-to-reach areas by using the side brush or radial brush
- Snow-free yard driveways, pavements and other paths and squares

Sweeping-machine

- Working width: 120 cm
- Brush ø 400 mm, 100 % PP-Bristles
- Hopper, mechanical emptying
- Hydraulic emptying / angling
- Side brush (hydraulic), 100% PP

Radial brush

- Operating width ø 120 cm
- Brush: 100 % PP

Weed brush

- ø 750 mm
- Hydraulically adjustable
- Incl. splash guard
- Various brush types available

High dump bucket

- Width 1020 mm
- Volume 210 l
- Hydraulic dumping

Rubber blade

- Operating width 160 cm
- Hydraulically adjustable

Snow blade

- Operating width 125 cm
- Hydraulic angling, on option

Weed brush

High dump bucket

Rubber blade

Small - Compact - Flexible.

TUCHEL-TRAC

MINI 3

For the
maintenance of
stables & properties

TUCHEL
MASCHINENBAU GmbH

A true vehicle miracle!

Small, compact, flexible and fast, that's our new **MINI 3**. Standard equipment includes hydrostatic front-wheel drive. The rear steering axle of the MINI 3 enables a turning radius of just 490 mm. Thanks to the quick-hitch system, the mounting and dismounting of various tools is particularly user-friendly. Thus, many jobs around your farm can be done comfortably and quickly.

Technical data		MINI 3
Dimensions (without tool)	mm	850 x 1690 x 1750 (width x length x height)
Motor / Capacity		Honda GXV 390 7,6 kW (10,2 HP) E-Starter and reversing starter
Drive		hydrostatic front-wheel drive via V-belt
Lifting system		hydraulic
Hydraulic connections		1 x single acting (11 l / 170 bar)
Weight	kg	290
Turning radius (inside)	mm	490

Measurements and weights are approx. and non-binding.

Options:

- Slurry scraper 105 cm, V-shaped, wear-resistant PU-double-lips (polyurethane)
- Slurry scraper 105 cm incl. side brush \varnothing 600 mm, 100% PP, hydr. swiveling, height is mechanically adjustable
- Bedding tool, volume 48 litres, for materials such as: sawdust, straw meal, lime
- Fodder push blade / snow blade 135 cm, right and left swiveling, incl. wear-resistant clearing lip; to lay fodder and to clean the feed table simultaneously, applicable also for snow clearance
- Fodder push blade / snow blade 135 cm incl. hydr. lateral adjustment
- Radial brush 105 cm, 100% PP, hydraulic, clockwise / anti-clockwise rotation
- Radial brush 105 cm incl. deflector plate, for a thorough cleaning of the feed alley
- Weed brush \varnothing 750 mm, mechanical adjustment
- Sweeper 100 cm, brush \varnothing 320 mm, 100 % PP, wheels \varnothing 140 mm, internal hydraulic motor,
- High fill dump bucket width: 87cm, volume 50l, hydraulic dumping

The main features at a glance:

- Hour meter
- Splash-proof ignition lock (IP66)
- Robust steering, mechanically via gear ring and steering linkage
- Quick-hitch (Exchange of tools from driver's position possible)
- Tool-less seat adjustment
- Easy accessible engine for maximum ease of maintenance
- Clearly arranged controls
- Steering wheel with integrated steering knob
- Ergonomically shaped foot pedal for the traction drive
- Self-tightening V-belt for the traction drive
- Comfortable getting on and dismounting from the vehicle

Parking brake

Clearly arranged controls

Weed brush \varnothing 750 mm

Ergonomically shaped foot pedal for the traction drive

Pushing - Sweeping - Scraping!

TUCHEL-TOOL
FARM-CLEAN

For
house &
yard area

TUCHEL
MASCHINENBAU GmbH

Handy, efficient and powerful!

A strong rod steering and big field tyres ensure a great performance. Basic equipment incl. hydraulic drive and hydraulic connections for further attachments, which can be tool-free mounted or dismounted.

Options

- **Infinitely variable traction drive**, up to 3,7 km/h
- **Extra wide field tyres**
- **Manure scraper**, V-shaped, 100 cm, type double-lip, incl. levelling, zinc-plated, with resistant diepothan-lips, ensures a simple and quick cleaning of slatted floors, even in narrow cow-houses
- **Fodder blade**, 110 cm angling right/left, incl. levelling, powder-coated, with wear-resistant clearing lip to distribute fodder and to clean the feed table simultaneously
- **Snow blade**, 95 cm, height 40 cm, angling right/left, incl. resistant wear lip, levelling, powder-coated.
- **Axial sweeper**, 75 cm or 100 cm, hydraulic drive, brush Ø 320 mm, 100 % PP, powder-coated, angling right / left, incl. levelling
- **Dirt collector**, 75 cm or 100 cm, powder-coated, suitable for axial sweeping-machine, incl. scraper lip.
- **Radial sweeper**, Ø 80 cm, 100 % PP, powder-coated, hydraulically driven, incl. right/left run.
- **Bedding tool**, volume 48 litres, for materials such as: sawdust, straw meal, lime
- **Side brush**, Ø 600 mm, 100 % PP, adjustable by inclination iron, incl. support wheel, to sweep high-bed cubicles

Technical data	
Engine	Honda petrol engine, 5,5 HP

Quality „made in Germany“!

Tuchel Maschinenbau GmbH – the inventor among the experts.

Again and again working machines and tools from TUCHEL set a new course in agriculture and construction business. In our modern manufacturing plant in Salzbergen our highly qualified personnel manufacture well over 3.000 machines per year. Our product range goes from road sweepers, snow blades and snow ploughs to hand-guided machinery and vehicles. Whether road sweepers, snow blades, hand-operated machines or multifunctional all-wheel-drive vehicles: Tuchel counts on quality and only uses high-quality components, such as eg. motors. That's another good reason for making Tuchel to your reliable business partner!
